# Brunno Soares da Silva

Cloud Engineer | Data Engineer | Python, SQL, Pandas, NumPy, PowerBI

São Paulo, São Paulo, Brasil

## Resumo

With a Bachelor's degree in Computer Engineering, I have been working in the field of Analytics and Business Intelligence for over 5 years, gaining experience in some of the largest companies, including major banks and prestigious universities. Throughout my career, I have honed my skills in analyzing data, developing insights, and driving impactful business decisions.

## Experiência

### Acelera Educacional

#### Analytics Specialist

setembro de 2022 - Present (2 anos)

- Managed all aspects of data engineering, including data ingestion, transformation, mapping, and ETL processes to ensure efficient data handling and quality.
- Developed and maintained data maps to ensure accurate data integration and consistency across different systems.
- Designed and created interactive dashboards and reports to support data-driven decision-making and business insights.
- Conducted analysis and research to identify opportunities for process improvements and optimization within the organization.
- Developed Python applications for lead management, enhancing the efficiency of lead tracking and management processes.
- Coordinated with teams to track and manage communication flows and campaign effectiveness, enhancing overall CRM strategy.

### Monnos

#### Data Engineer / BI

setembro de 2021 - setembro de 2022 (1 ano 1 mês)

- Managed all aspects of data engineering, including data ingestion, transformation, and mapping to ensure accurate and efficient data processing.
- Developed and maintained ETL pipelines to automate the extraction, transformation, and loading of data from various sources.

- Created and managed data maps to ensure accurate data integration and consistency across different systems and platforms.
- Designed and developed interactive dashboards and reports to provide insights and support data-driven decision-making.
- Conducted data analysis and research to identify opportunities for improvement and optimization within business processes and systems.
- Leveraged data science techniques to perform studies and implement enhancements aimed at increasing efficiency and effectiveness.

## Next (oficial)

### Data Engineer

janeiro de 2020 - setembro de 2021 (1 ano 9 meses)

- Oversaw the entire data lifecycle including ingestion, transformation, and processing to ensure data quality and availability.
- Developed and maintained robust ETL pipelines to efficiently extract, transform, and load data from various sources.
- Designed and implemented new database schemas and tables to meet specific business needs and data requirements.
- Worked on the implementation and maintenance of Data Lake solutions to store and manage large volumes of data.
- Participated in the initial process of Azure cloud deployment, contributing to the setup and integration of cloud infrastructure.
- Worked closely with BI, CRM, and Data Science teams to provide accurate and timely data for analysis and decision-making.
- Enhanced data processing workflows and optimized data storage solutions to improve performance and scalability.

## Palmont Construção e Montagem Industrial LTDA.

### Systems Analyst

janeiro de 2015 - janeiro de 2020 (5 anos 1 mês)

São Paulo e Região, Brasil

- Responsible for all maintenance and updating of TOTVS Protheus system.
- Customization of routines.
- CNAB configuration.
- Support with E-social.
- Responsible for coordinating the help desk and infrastructure team.
